Professional Summary

Java Full Stack Developer with training and project experience in Java, Spring Boot, Angular, REST APIs, Microservices, and SQL. Worked on a microservices-based online learning platform and a RAG-based Generative AI assistant. Skilled in developing backend APIs, integrating frontend and backend components, and building full-stack applications.

Technical Skills

Languages: Java, SQL, TypeScript, Python, HTML, CSS
Backend: Spring Boot, REST APIs, Microservices
Frontend: Angular
Database: MySQL
AI / GenAI: RAG, LLMs, Vector Retrieval
Tools: Git, GitHub, Postman, Eclipse, Visual Studio Code
Additional: Verilog, SystemVerilog, UVM

Experience

Infosys *June 2026 – October 2026*
Java Full Stack Developer Trainee

- Completed Java Full Stack training with practical exposure to Java, Spring Boot, Angular, REST APIs, Microservices, and SQL.
- Worked on two full-stack projects involving backend development, frontend integration, database connectivity, and application workflows.
- Developed Spring Boot REST APIs for core application workflows and integrated backend services with Angular components.
- Used Git, GitHub, Postman, Eclipse, and Visual Studio Code for development, API testing, and debugging.

Projects

Infy LearnX *Java, Spring Boot, Angular, Microservices*

- Built an online learning platform with role-based features for students, instructors, and administrators.
- Implemented course creation and enrollment, progress tracking, quizzes, assessments, and certificate generation.
- Developed Spring Boot REST APIs for learning workflows, enabling communication between microservices and the Angular application.

PassportSahayak AI *Java, Spring Boot, RAG, Generative AI, LLM*

- Built a RAG-based assistant for passport eligibility, document requirements, appointments, and application guidance.
- Implemented query processing, vector retrieval, and prompt augmentation to generate grounded responses with citations.
- Developed Spring Boot REST APIs for query handling and integrated knowledge-base retrieval into the response-generation pipeline.

Sign Language to Speech & Text Translation *Python, Machine Learning*

- Developed a camera-based sign language translation system using Python and machine learning to recognize hand gestures.
- Converted recognized gestures into text and speech to support communication accessibility.

Education

R.M.D Engineering College Chennai, India
B.E. in Electronics and Communication Engineering 2021 – 2025
CGPA: 7.28

Narayana Junior College Renigunta, India
Intermediate (MPC), 82.3% 2019 – 2021

Sri Chaitanya School Sri Kalahasti, India
X Class, GPA: 9.7 2018 – 2019

Certifications

NPTEL – Joy of Computing Using Python
Infosys Springboard – 5G and Wireless Communication
Cisco – Introduction to Networks, Cyber Security
HackerRank – Python (Basic)
Udemy – C Programming
